Petition to our elected officials:

Davis-Monthan Air Force Base (D-M) uses the airspace over Tucson as training grounds for military airplanes and helicopters. The current daytime and nighttime operations from these aircraft produce noise, air pollution, and crash hazards that reduce the quality life of the residents of Tucson. According to the Governor's draft Joint Land Use Study, D-M is likely to double the number of daily flight operations, operate noisier aircraft, and launch more flights at night.

We, the undersigned residents of Pima County, believe that military overflights near Tucson's urban center are no longer environmentally, socially, or economically sound. **We request that overflights from D-M be adjusted to reduce the noise, air pollution, and crash hazards to the people of Tucson.**
